

FSC ANNOUNCEMENT

Contrary to a report published in Fiji Times on 13 May 2020, the Fiji Sugar Corporation confirms that its Packaging Plant continues to operate as normal without any disruptions. Whilst temporary suspension of packing was recently considered, it was deemed inappropriate under current conditions and normal operations will continue. The supply of “Sugars of Fiji” products to the domestic market will continue to be made as normal. Workers of the FSC Packaging Plant will not be affected in any way. FSC is continuously working to improve its processes and services to achieve high product quality and give better value to its customers.

We would like to thank our customers for the support and confidence in “Sugars of Fiji” products.
